CHANGES IN COLLAGE SITE 1.7.3

NEW FEATURES AND IMPROVEMENTS

Collage Site is an in-field registration tool for Topcon Scanners and Scanning Total Stations. Features and Improvements in this version of Collage Site are as follows:

- Support for the new CR-P1 scanning instrument
- Significant improvements have been implemented to the overall processing speeds of point cloud data. Users can expect faster processing times across various scan qualities and imaging settings
- Added a new guide to getting started with Collage Site inside the Knowledge Base
- Added Chinese language support
- Added a new Tag Target feature that allows users to create target layers in Collage Site using point cloud scan data
- Added a new button that will manually restart a scan transfer if it fails due to weak WiFi signal

BUG FIXES

The following issues have been resolved since the latest release of Collage Site:

- Added work around for users experiencing Server Authentication Error
- Fixed various installation issues and errors
- Fixed an issue where control point files with too many decimal places were causing errors
- Fixed various issues with auto leveling the ESN-100 instrument
